About Us - Our Product

Due to the ever-increasing importance to recycle & protect the environment, our products are made from 100% recycled plastic. All the plastic used is recycled in the U.K. and is a perfect alternative to wood. Our aim is to help rebuild the environment by utilising a commodity, which people would otherwise just throw away, and so turn what to some would be rubbish into a valuable and sustainable product for everybody.

What can the plastic be used for?

The manufactured plastic has many practical and very useful properties. The main base of our products are in the form of planks and posts which can be used on their own for Garden Fences, both low for front gardens and high for side and back fences for instance, along road sides, and around fields & paddocks just to name a few. It is also possible to produce a number of other products out of our plastic, such as picnic tables. These would vary in size suitable for adults and children. Park benches, outdoor tables, square or rectangular plant boxes, decking and seating. The list is endless.

Why are recycled plastic products different?

Plastic lumber is the perfect alternative to anything that has ever needed maintaining. Plastic lumber can be cut with a regular saw, drilled, nailed, or screwed into, and routed as easily as wood.

- Does not rot.
- Will not need painting or staining.
- Is wear resistant.
- Resistant to vandalism.
- Resistant to salt water.
- Resistant to insects & bacteria.
- Does not split or splinter.
- Is completely maintenance free.
- It is graffiti resistant
- Resistant to the elements.
- Resistant to chemicals.
- Will not break, even in extremely hot or cold conditions.

How strong is it?

It is extremely solid and strong being able to withstand stress levels of well over 10 tons. It is heavy, durable, virtually indestructible and will not need to be replaced. In short, it is worry free!

Is there a colour choice?

Yes. Our main colours are black and brown. However, we can make various products in a range of basic colours. This removes the need for painting, whatever colour is required, just ask.

Will it burn?

Nothing is completely non-flammable. Our products have an initial high flame resistance level. However, if encouraged our plastic can show similar burning characteristics as wood, as well as melt if exposed to intense heat.. eg. Fire pits & BBQ's.

Does it need to be cleaned?

Our products only need to be cleaned after a spillage. The collection of airborne dirt is inevitable and we would recommend a simple spray down with a hose or wipe over with a damp cloth will ensure that your purchase is kept in the best condition.

Is it more expensive than wood?

No. The initial amount payable is more than wood, but our products are an investment as they never need to be replaced. When the costs for replacing fencing or garden furniture are taken into consideration, both wooden and metal, due to corrosion, fatigue or natural deterioration plus maintenance materials, solid plastic lumber and furniture quickly pays for itself and in the long run saves a lot of time and money.

We hope that this page has answered most of your questions. However, please do not hesitate to **contact us** if there is any further information that you would like.

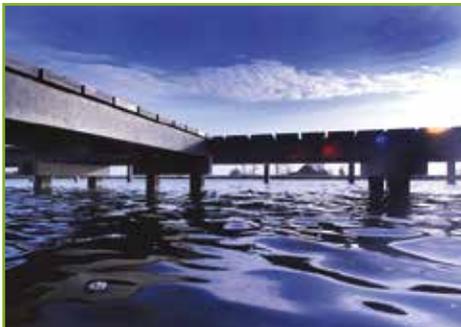

What Recycled Plastic Products are Available?

With developments in our modern technology, the range of products available made using recycled plastic is expanding rapidly. While this list is not exhaustive, it shows the wide variety of products particularly suited to landscaping and construction applications.

- Outdoor furniture including Benches and Picnic Tables
- Decking and Walkways
- Fencing and Gates
- Bollards
- Litter Bins
- Signage
- Fishing Platforms
- Jetties & Pontoons
- Fendering
- Children's play equipment
- Equestrian equipment – such as Horsejumps
- Drainage products
- Paving / Driveways
- Stabilisation grids

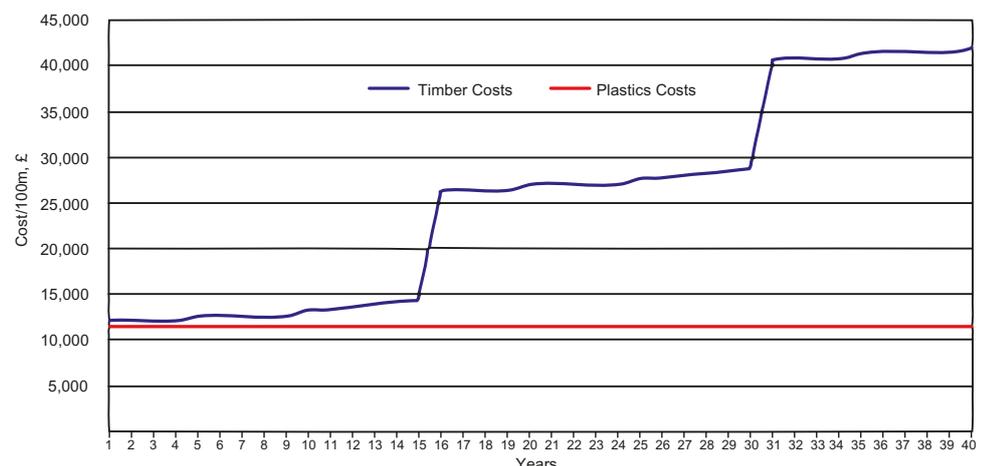

“ Not only was delivery prompt and easy, the Reformed Plastics driver incredibly Helpful. The product is Great, and 4 years on still looks brand new. Better yet it's Recycled ”
 Doug Kirby - 2013

Financial benefits

Achieving value for money is a key driver for any purchasing decision. Although some recycled products have greater up-front costs, their longevity and durability make them a more cost-effective option over the long term.

Recycled plastic products can offer savings of up to 50% per annum in whole life costs over a period of 40 years.

Recycling has never looked so Good!

Recycling is an excellent way of saving energy and conserving the environments natural resources. The unreleased energy contained in the average dustbin each year could power a television for 5,000 hours.

We offer closed loop recycling, by diverting post consumer plastic waste from landfill and manufacturing it into a huge variety of usable products.

For example 42,000 plastic bottles equals 1 tonne = 7.7 picnic tables (130 Kgs each).

Resellers

Are you the owner of a garden centre, equestrian centre, or agricultural store?

Our products have so many advantages; why not add value to your business by offering them to your customers. Resellers obtain a discount of the retail price and have a direct line to our customer support team for help or assistance.

Although, our products are custom, we recommend that resellers buy a number of our standard products that can be used in varying situations.
